About

I am a Computer Science student specializing in AI/ML, with hands-on experience in full-stack development and deep learning. I enjoy building practical, user-focused applications that combine AI, design, and engineering.

Education

PES University

B.Tech in Computer Science & Engineering (AI/ML)

- **Coursework:** DSA, OS, CN, Web Technologies

Aug 2023 – June 2027

Bengaluru, India

Experience

Wimera Systems

Full Stack Intern

June 2025 – July 2025

- **Architected** a full-stack PCB management tool using Python and Node.js, processing and tracking **over 10,000 component data points** in real-time.
- **Engineered 15+ RESTful API endpoints** with Express.js for data handling, **reducing query response times by 30%** through efficient server-side logic.
- **Constructed** a responsive front-end using vanilla JavaScript, achieving a **95% score on Lighthouse performance audits** and ensuring cross-browser compatibility.

Projects

Rise With The Sun

Next.js, TailwindCSS, React, Vercel

[GitHub](#)

[Live Demo](#)

- **Launched** a pixel-perfect, responsive **10-page marketing site** for a luxury farmhouse, leading to a **40% increase in initial user engagement**.
- **Fabricated 8+ dynamic React components**, including a responsive gallery that **improved image load speeds by 35%** by implementing lazy loading.
- **Leveraged** Vercel's global CDN and image optimization, resulting in an **average page load time of under 1.2 seconds** and near-100

Echo Lip

Deep Learning, 3D CNNs, TensorFlow, Keras, Streamlit, MongoDB, OpenCV, DLIB

[GitHub](#)

- **Engineered** a deep learning-based lip-reading system using **3D CNNs** to transcribe speech from silent videos, achieving **97.4% accuracy** on benchmark datasets.
- **Authored** robust preprocessing pipelines with OpenCV and DLIB to segment and enhance **over 5,000 video frames**, enabling real-time subtitle generation.
- **Delivered** a full-stack AI application with a Streamlit front-end, providing an intuitive UI for **100s of test users** to generate real-time transcriptions.

VanillaJS Schematic Designer

HTML5, CSS3, Vanilla JavaScript, JSON

[GitHub](#)

- **Pioneered** a feature-rich, browser-based schematic design tool from scratch using vanilla JavaScript, HTML5 Canvas, and SVG.
- **Integrated** an interactive toolkit with **12+ core features**, including custom SVG creation, element manipulation (drag/resize/rotate), and a snap-to-grid system.
- **Integrated** a task assignment module, enabling **100% state persistence** across sessions via JSON and Local Storage.

Technologies

- **Languages:** Python, SQL, HTML/CSS, JavaScript
- **Technologies:** ReactJS, ExpressJS/NextJS, MongoDB
- **Soft Skills:** Communication, Leadership, Teamwork, Time Management

Certifications

- Machine Learning with Python – Simplilearn Dec 2024
- Deep Learning Essentials: Neural Nets With PyTorch Nov 2024
- Problem Solving (Basic) – HackerRank March 2025
